

“Multi Design Art Deco” Instructions

Design layout reference sheet included.

For all designs you will need to use a 6mm stylus tool for the embossed designs.

- ◆ *Make sure you lubricate your card before you start to emboss with a tumble dry sheet as card dries out when stored and this gives the stylus tool some slick to enable it to glide easily over the design.*
- ◆ *Take a piece of pretty card and place the open card onto the Embossing Board over the chosen design with the front of card (pretty side) face down on the embossed image.*
- ◆ *Line up the card against the appropriate raised rests – these are used to stop the card slipping*
- ◆ *Emboss 1 line at a time using the patented lead-in channels , working around the image until all of the design has been completed.*
- ◆ *4 beautiful border designs give the facility to decorate the edge of a folded card and the exquisite features such as heart and leaves etc can be decouped if you wish.*
- ◆ *The lovely borders can be used to create stunning card wallets for money, tickets, invitations and lovely greeting cards.*
- ◆ *The stunning ornate cross can be used for a number occasions such as Easter, Wedding, Anniversary, Christmas, Confirmation, Holy Communion , Christening and other festivals etc.*
- ◆ *The lovely delicate designed frame can be used for all card projects or the perfect setting for the finished cross designs.*
- ◆ *A lovely addition is the clever Deco panel – can be used as a complete panel either embossed straight onto card to use all of your beautiful pieces of spare card to create little tiles and build up your own design – to create a layered effect or why not use part of the frame to compliment any card designs – the permutations of this are endless.*
- ◆ *Another multi design board to add to your Keepsake Collection*
