

"Mini Boox" Instructions

Design layout reference sheet included.

*Keepsake
Card Craft*

For all designs you will need to use a 6mm stylus tool for the embossed designs

- ◆ *Make sure you lubricate your card before you start to emboss with a tumble dry sheet as card dries out when stored and this gives the stylus tool a smooth surface to enable it to glide easily over the design.*
- ◆ *Take a piece of pretty card and place the open card onto the Embossing Board over the chosen design with the front of the card (pretty side) face down on the embossed image.*
- ◆ *Line up the card against the appropriate raised rests – these are used to stop the card slipping.*
- ◆ *Emboss 1 line at a time using the patented lead-in channels, working around the image until all of the design has been completed.*
- ◆ *The beautiful Baby "Bookatrix"[™] truly extends the wealth of possibilities now available to you using the Famous "Bookatrix"[™] design. Emboss and cut out 3 different sizes of the book pages on matching card, slightly curve the pages, edge in fine border peeloffs, and decorate as desired. When complete glue the top two sizes down the middle spine of the base page, perhaps put a piece of ribbon around the top page spine before gluing to have a pleasing effect.*
- ◆ *The delightful cute flower card is created by embossing the shape twice and glueing down the middle to create a mini-star book, you can of course emboss many more 'pages' to create a multi page star book, edge in peeloffs and decorate with your favourite embellishments.*
- ◆ *The new "Bookafleur in Miniature"[®] emboss large outer shape, continue to emboss as many layers of the different shapes as you wish, edge in peeloffs and layer with sticky pads – decorate as you wish.*
- ◆ *The "Tiny Tinkling Bells"[®] create a lovely card in miniature, emboss the basic shape using the stand corners and layer in different card matching colours edge in fine peeloffs and decorate.*
- ◆ *A delicate "Little Tall Book"[®] can be created by embossing the basic shape twice and glueing back to back, emboss separate half pages, edge in fine peeloffs and glue into the main book, layer the extra embellishments onto the pages - creating a perfectly stunning little open page book.*
- ◆ *A tiny open heart book creates a stunning effect with layers of the heart in different sizes providing a 3D appearance edged in fine peeloffs and decorated with flowers and embellishments – a lovely card for all occasions.*
